

Local Land Services

Equine acres: Land management for horse owners

South East Local Land Services invites you to this workshop designed to help horse owners develop a more sustainable property that benefits owners, horses and the environment.

You'll learn key concepts for managing your horse property more sustainably. With the health and wellbeing of horses at the centre of our discussions, we'll examine:

- grazing behaviour of horses
- grazing management of horses
- steps to creating more sustainable properties to support healthy horses
- practical solutions to common problems faced by horse owners.

This is an opportunity for horse owners on a small to medium-sized property to review and refine your grazing management skills for the benefit of your horses and your land.

Date and time

Wednesday 6 May 2026
9:30 am to 3:30 pm
